**1st Course Isometric**

- Keystone Stonegate Units (Typ.)
- Patio Aggregate Base Below
- Block Removal as Req. (Typ.)
  
  (See Ventilation Note)

**Block Placement Note:**

Partially damaged or visually impaired block units may be used in the front base area of the fireplace just behind the hearth extension. Insure those units are structurally sound.

**1st Course Plan**

- Keystone Stonegate Units (Typ.)
- Block Removal as Req. (Typ.)
  
  (See Ventilation Note)

**Patio Aggregate Base Below**

**Ventilation Note:**

The fireplace insert manufacturer may recommend ventilation of the interior fireplace area from a potential gas build up. If so, depending on the recommendations, one or two blocks from either the 1st course or 2nd course may be removed as needed. Only remove blocks from one chosen course. Blocks marked with angular hatching are designated for removal as required on this course. As needed a small animal screen insert can be supplied to place in the block removal area.

If the 2nd course is to be used for venting, place and carefully compact crushed stone or similar material to form a dense floor in the entire 1st course interior open area of the fireplace. The removed 2nd course blocks may be placed in the 1st course interior open area in conjunction with fill material or in the fireplace element itself as needed.
Note: This Fireplace design uses Keystone Stonegate units. Units shown are dimensioned as follows:

- **Large Unit “A”**: 16”/14”
- **Medium Unit “B”**: 12”/10”
- **Small unit “C”**: 6”/4”

**Block Placement Note:**
Partially damaged or visually impaired block units may be used in the front base area of the fireplace just behind the hearth extension. Insure those units are structurally sound.

3rd Course Isometric

Keystone Stonegate Units (Typ.)

Block Placement Note:
Partially damaged or visually impaired block units may be used in the front base area of the fireplace just behind the hearth extension. Insure those units are structurally sound.

3rd Course Plan

(See Block Placement Note)

2nd Course Below

Keystone Stonegate Units (Typ.)
Hearth Installation Note:
Install and align the hearth(s) for the fireplace on top of the 3rd course block units hearth extension(s), as shown. Unless otherwise directed, secure the hearth(s) with approved adhesive or bonding agent.
Fireplace Insert Bottom Plate Installation Note:
Install and align the bottom plate for the fireplace insert on top of the 3rd course block units so the rear bottom plate flanges (2) fit in the openings between the blocks of the 4th course above, as shown.
Also, align the front of the bottom plate with the front block units and fireplace hearth for proper alignment.

Install the fireplace insert upper back, sides and top plates w/flanges after the installation of the 7th course.

See fireplace manufacturers assembly instructions to properly assemble the fireplace pieces.

Fireplace Burner Insert Note:
It is recommended to use a stainless steel outdoor fireplace H-burner insert not to exceed 32"L x 8"W with suitable hose and regulator accessories.
Use 1 cubic foot ± of suitable fire glass or fire rock material to fill the recessed section of the fireplace bottom plate. Install as per manufacturers assembly instructions.

Block Openings to Receive Fireplace Insert Bottom Plate Flanges (2)
Install Fireplace Insert Bottom Plate as Required (See Fireplace Insert Bottom Plate Installation Note)

Install Fireplace Burner Insert on Bottom Plate as Required (See Fireplace Burner Insert Note)

KEYSTONE STONEGATE UNITS (Typ.)

This Fireplace design uses Keystone Stonegate units. Units shown are dimensioned as follows:
□ Large Unit “A” - 16”/14”
□ Medium Unit “B” - 12”/10”
□ Small unit “C” - 6”/4”
□ All Units are 10” in depth / 6” in height

Access Door Installation Note:
Align the access door in the door opening so that the access door top support flanges of the door frame are resting on top of the 5th course blocks. Make sure the top support flanges are bearing equally on the blocks on both sides of the opening and they also are 5” back from the outside face of the blocks to the center of the flange so the 6th course block pin connecting channels will be centered over the top support flanges. After the 6th course blocks are placed, if needed, reposition the access door assembly and secure in place as instructed.
This Fireplace design uses Keystone Stonegate units. Units shown are dimensioned as follows:

- Large Unit “A” - 16”/14”
- Medium Unit “B” - 12”/10”
- Small Unit “C” - 6”/4”

All Units are 10” in depth / 6” in height.
Install Fireplace Insert as Required (See Fireplace Insert Upper Installation Note)

Fireplace Insert Upper Support Flange (Both Sides), (4) (See Fireplace Insert Upper Installation Note)

82'' (6'-10'') Fireplace

5'' to 8'' of Flange (2)

20'' 42'' Opening 20''

Install Fireplace Insert as Required (See Fireplace Insert Upper Installation Note)

Fireplace Insert Upper Support Flange (Both Sides), (4) (See Fireplace Insert Upper Installation Note)

Keystone Stonegate Units (Typ.)

Fireplace Insert Upper Support Flange (Both Sides), (4) are properly resting on top of the 7th course block units. Make sure the top front support flanges are bearing equally on the blocks on both sides of the fireplace insert opening and they also are 5" back from the front outside face of the blocks to the center of the flange, so the 8th course block pin connecting channels above will be centered over the top front support flanges.

The rear top flanges will fit between the block spaces of the 8th course above. After the 8th course blocks are placed, if needed, reposition the fireplace insert assembly and secure in place as instructed.

This Fireplace design uses Keystone Stonegate units. Units shown are dimensioned as follows:

□ Large Unit "A" - 16"/14"
□ Medium Unit "B" - 12"/10"
□ Small unit "C" - 6"/4"
□ All Units are 10" in depth / 6" in height
