L-Shaped Grill Station - w/o Seating
3-Pallet Design
L-Shaped Grill Station - w/o Seating

Outlook Grill Station Quantity Totals:
Stonegate Unit quantities as follows:
- Large Unit "A" - 16'/14" = 56 Units
- Medium Unit "B" - 12'/10" = 56 Units
- Small Unit "C" - 6'/4" = 57 Units

For Accessories - see page 2

General Note:
In consideration of freeze / thaw issues during the cold weather season it is recommended that this outdoor Built-In Grill Station element be protected from rain, snow and ice as necessary.
L-Shaped Grill Station - w/o Seating

ACCESSORIES Sold Separately

- Grill Filler Piece
  See page 10 or 20 for grill filler piece dimensions.

- Access Door w/Vents
  Model FPI - D, D/S
  See page 12 or 20 for access door details.

- Built-In Grill Head Insert

- LEFT Facing Counter Top
  See page 22 for left facing counter top dimensions.

- RIGHT Facing Counter Top
  See page 12 for right facing counter top dimensions.

Stonewater Note:
This Outdoor Living Element design uses Stonewater No-Cut Designs accessories.
See Stonewater No-Cut accessories list for qualifying manufacturers and models.

Note:
This built-in grill head insert shown for display purposes only.
L-Shaped Grill Station - w/o Seating

Outdoor Grill Station Quantity Totals:
Stonegate Unit quantities as follows:
- Large Unit "A" - 16"/14" = 56 Units
- Medium Unit "B" - 12"/10" = 56 Units
- Small Unit "C" - 6"/4" = 57 Units

Note:
Structural support for block units over openings not shown for visual purposes.

General Note:
In consideration of freeze / thaw issues during the cold weather season it is recommended that this outdoor Built-In Grill Station element be protected from rain, snow and ice as necessary.

1st Course Plan

Ventilation Note:
The grill head insert manufacturer may recommend ventilation of the interior grill station area from a potential gas build up. If so, depending on the recommendations, one or two blocks from either the 1st course or 2nd course may be removed as needed. Only remove blocks from one chosen course. Blocks marked with criss cross hatching are designated for removal as required on this course. As needed a small animal screen insert can be supplied to place in the block removal area.

If the 2nd course is to be used for venting, place and carefully compact crushed stone or similar material to form a dense floor in the entire 1st course interior open area of the grill station. The removed 2nd course blocks may be place in the 1st course interior open area in conjunction with fill material or in the grill station element itself, as needed.
L-Shaped Grill Station - w/o Seating

Ventilation Note:
The grill head insert manufacturer may recommend ventilation of the interior grill station area from a potential gas build up. If so, depending on the recommendations, one or two blocks from either the 1st course or 2nd course may be removed as needed. Only remove blocks from one chosen course. Blocks marked with criss cross hatching are designated for removal as required on this course. As needed a small animal screen insert can be supplied to place in the block removal area.

If the 2nd course is to be used for venting, place and carefully compact crushed stone or similar material to form a dense floor in the entire 1st course interior open area of the grill station. The removed 2nd course blocks may be place in the 1st course interior open area in conjunction with fill material or in the grill station element itself, as needed.

Note:
This Grill Station design uses Keystone Stonegate units. Units shown are dimensioned as follows:
- Large Unit "A" - 16"/14"
- Medium Unit "B" - 12"/10"
- Small unit "C" - 6"/4"
- All Units are 10" in depth / 6" in height

This Grill Station design uses Keystone Stonegate units. Units shown are dimensioned as follows:

- Large Unit “A” - 16”/14”
- Medium Unit “B” - 12”/10”
- Small unit “C” - 6”/4”
- All Units are 10” in depth / 6” in height
Access Door Installation Note:
Align the access door in the door opening so that the access door top support flanges of the door frame are resting on top of the 5th course blocks. Make sure the top support flanges are bearing equally on the blocks on both sides of the opening and they also are 5" back from the outside face of the blocks to the center of the flange so the 6th course block pin connecting channels will be centered over the top support flanges. After the 6th course blocks are placed, if needed, reposition the access door assembly and secure in place as instructed.
